

Your Industrial Engineering partner

ISI MP is a multidisciplinary engineering and design office specializing in the design and manufacturing of industrial equipment of high technical and innovative value. We accompany everyday major accounts and engineering companies in their development projects.

Our fields of activity

- Assembly workstations, special machines, test benches, specific tools,
- Logistical and handling tools - Specialist in handling and transport fittings.

A performance-based organization

- Fully integrated in design, calculation, integration and installation on the customer site, key elements of a successful project
- Panel of partners for the manufacturing of elementary parts in all the fields, in order to offer the best technical solutions to our customers

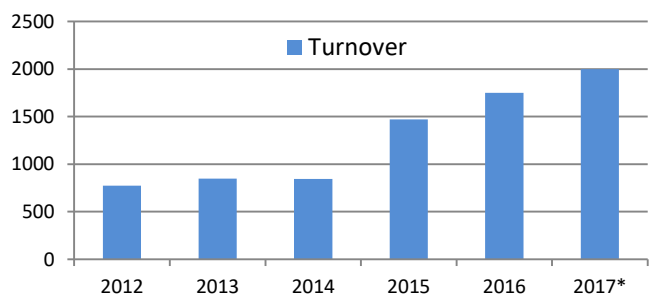

Optimized resources

- **IT park with the following software:**
 - 3D CAD CATIA V5 (15 000 H/year)
 - FEM ANSYS Workbench NLS (1 500H/year)
 - Library of standard components TRACE PART
 - Planning with MS Project
- **Integration and development workshop**
 - Laser tracker measurement
- **Laboratory for Automation and Electronics**
- **Large panel of manufacturing partners**
 - Casting in steel and aluminum
 - Welded structures in steel, stainless steel, aluminum
 - Structures in composite materials
 - Precision machining 3, 4 and 5 axis
 - Heat treatment, surface treatment and painting

Key facts and figures

15 people located on 2 sites :

- Toulouse: Design office and workshop
- Nantes - Saint-Nazaire: Design office
